AFRICAST

TIDY TIME SERIES & FORECASTING IN R

Introduction

Project lead and Instructors

Bahman Rostami-Tabar

Professor of Data Driven Decision Making and Director of the Data Lab for Social Good, Cardiff Business School. Founder of the Forecasting for Social Good (F4SG) community and leader of the AFRICAST project.

Rostami-TabarB@cardiff.ac.uk

Mitchell O'Hara-Wild

Time series researcher and R developer, Monash University. Developer of the `fable`, `tsibble` and `fabletools` packages used throughout this workshop.

Instructors

Abiodun Egwuenu

Medical doctor and field epidemiologist. PhD candidate at Charité – Universitätsmedizin Berlin modelling antimicrobial resistance (AMR). Led Nigeria's 2022/23 mpox response.

Harsha Halgamuwe Hewage

Researcher, Data Lab for Social Good, Cardiff Business School. Forecasting and decision support for public health supply chains; researches time series foundation models.

Mustafa Aslan

PhD researcher, Data Lab for Social Good, Cardiff University. Probabilistic forecasting and optimisation for hospital patient flow. Developer of the `peshbeen` forecasting package.

Facilitator

- Abiodun Egwuenu

Planning team

- Mkajuma Charity
- Kennedy Mung’are
- José Thiéry Hagbe

Mentors

- Samson Oluwafemi
- Oluchukwu Aghadi
- Lumumba Victor
- Adamu SAIDU Saleh
- Akoeugnigan Idelphonse SODE
- AKOUNDA Badjibassa
- Caroline Mugo
- Winnie Chacha
- Matabel Odin

Coordinator

- Henry Kissinger Ochieng

Assumptions

- This is not an introduction to R. We assume you are broadly comfortable with R code, the RStudio environment and the tidyverse.
- This is not a statistics course. We assume you are familiar with concepts such as the mean, standard deviation, quantiles, regression, normal distribution, likelihood, etc.
- This is not a theory course. We are not going to derive anything. We will teach you time series and forecasting tools, when to use them, and how to use them most effectively.

Key reference

Hyndman, R. J. & Athanasopoulos, G. (2021) *Forecasting: principles and practice*, 3rd ed.

OTexts.org/fpp3/

- Free and online
- Data sets in associated R package
- R code for examples

Reference - Recommended

Kolassa S., Rostami-Tabar B., & Siemsen, E. (2023) *Demand forecasting for executives and professionals*, 1st ed.

dfep.netlify.app

- Free and online
- Not an in-depth technical book
- Mindset behind forecasting
- Overview of forecasting methods and processes

International Institute of Forecasters (IIF)

- Certificate will be provided by IIF. You need to attend all lectures and exercise sessions to get the certificate.
- A nonprofit organisation founded in 1982, dedicated to developing and furthering the generation, distribution, and use of knowledge on forecasting.

Poll: How proficient are you in using R?

Guru: The R core team come to me for advice.

0 0%

Expert: I have written several packages on CRAN.

0 0%

Skilled: I use it regularly and it is an important part of my job.

0 0%

Comfortable: I use it often and am comfortable with the tool.

0 0%

User: I use it sometimes, but I am often searching around for the right function.

0 0%

Learner: I have used it a few times.

0 0%

Beginner: I've managed to download and install it.

0 0%

Unknown: Why are you speaking like a pirate?

0 0%

Poll: How experienced are you in forecasting

Guru: I wrote the book, done it for decades, now I do the conference circuit.

0 0%

Expert: It has been my full time job for more than a decade.

0 0%

Skilled: I have been doing it for years.

0 0%

Comfortable: I understand it and have done it.

0 0%

Learner: I am still learning.

0 0%

Beginner: I have heard of it and would like to learn more.

0 0%

Unknown: What is forecasting? Is that what the weather people do?

0 0%

Install required packages

```
install.packages(c(
  "tidyverse",
  "fpp3",
  "GGally",
  "ggtime",
  "astsa"
))
```

Approximate outline

Session	Topic	Chapter
1	1. Basics of time series and data structures	2
1	2. Time series patterns and basic graphics	2
2	3. Computing and visualising features	4
2	4. Basic modelling / forecasting	1,3,5
3	5. Forecasting with regression	7,10
3	6. ARIMA models	9
4	7. Exponential smoothing	8
4	8. Basic training and test accuracy	5
5	9. Residual diagnostics and cross validation	5
5	10. Time series foundation models	–

workshop.f4sg.org/africast

Schedule for each session (UTC+3)

- Start at 10:00 a.m.
- Lecture 1: 10:00 - 11:30
- Break: 11:30 - 11:45
- Lecture 2: 11:45 - 13:15
- Exercises: 14:00 - 17:00 (on your own)
- Mentorship: 17:00 - 18:00
